SUMMARY

Passionate Web Developer and UI/UX Designer skilled in building interactive web interfaces. Currently learning Python and focused on creating clean, user-friendly designs. Looking to work on real-world projects and grow as a developer.

PROJECTS

AI Resume Screening System

- Designed a smart system to analyze and filter resumes for HR
 - Built user-friendly interfaces for resume upload and candidate search
 - Implemented basic AI-based logic for skill matching and screening
 - Improved hiring efficiency by reducing manual shortlisting process
- DEMO : [zynex-lovat.vercel.app](#)

Automatic Greeting Card Generator

- Developed a system to generate personalized greeting cards automatically
 - Designed user-friendly templates with customizable text and layouts
 - Implemented dynamic content generation for different occasions
 - Improved user experience by enabling quick and creative card creation
- DEMO : [greeting-card-hazel.vercel.app](#)

Skill Swap

- Developed a peer-to-peer skill exchange platform using Django, HTML, CSS, and js
 - Implemented user registration, authentication, profiles, and skill management.
 - Built skill swap requests, learning progress tracking, and session management.
 - Added user messaging, notifications, reviews, and admin management features.
- DEMO : <https://skillswap-1-5tnt.onrender.com>

ACHIEVEMENTS

- Participated in Smart India Hackathon (SIH)
- Participated in VIT Hackathon
- Presented project at college-level Project Expo
- Participated in DXSO Hackathon – Secured 2nd Prize
- Participated in E-HORIZON Hackathon in KEC

CERTIFICATIONS

- Full Stack Development with Generative AI – Online Course
- UI/UX Design Workshop – Adhiyamaan College
- AR/VR Technology Workshop – Adhiyamaan College

Experience

- **Frontend Developer Intern**

ChattingBirds, Hosur

Duration: 3 months

- Developed responsive UI components using HTML, CSS, and JavaScript
- Collaborated with design team to improve user interface
- Assisted in debugging and performance improvements

- **Software Engineer Intern**

DXSO pvt ltd, Hosur

Current

- Assisting in the design and development of scalable web applications and software solutions.
- Supporting frontend, backend, API, and database development activities.
- Participating in software testing, debugging, documentation, and deployment activities

Projects

1.Unified Digital Marketing (UDM) – Social Media Management Platform

- Developed a centralized platform for managing and publishing social media content across multiple platforms.
- Implemented content creation, scheduling, multi-platform publishing, social account management, and analytics.
- Developed backend services using Node.js and Express.js with PostgreSQL for data management.

2.Blood Bank Management System (BMS)

- Developed a multi-tenant blood bank management system with role-based access control (RBAC).
- Built blood bag traceability using barcode/QR-based identification and organization-level data isolation.
- Developed configurable billing, invoice, payment recording, and receipt generation modules.
